

# SIMBANK

MODERN BANKING SIMULATION SOFTWARE TO EDUCATE  
FUTURE BANK EMPLOYEES ALL OVER EUROPE

## INTRODUCTION

# What is SIMBANK?

We have created a **React-based** web application that simulates the environment **bank clerks** use daily when interacting with customers.

## KEY FEATURES

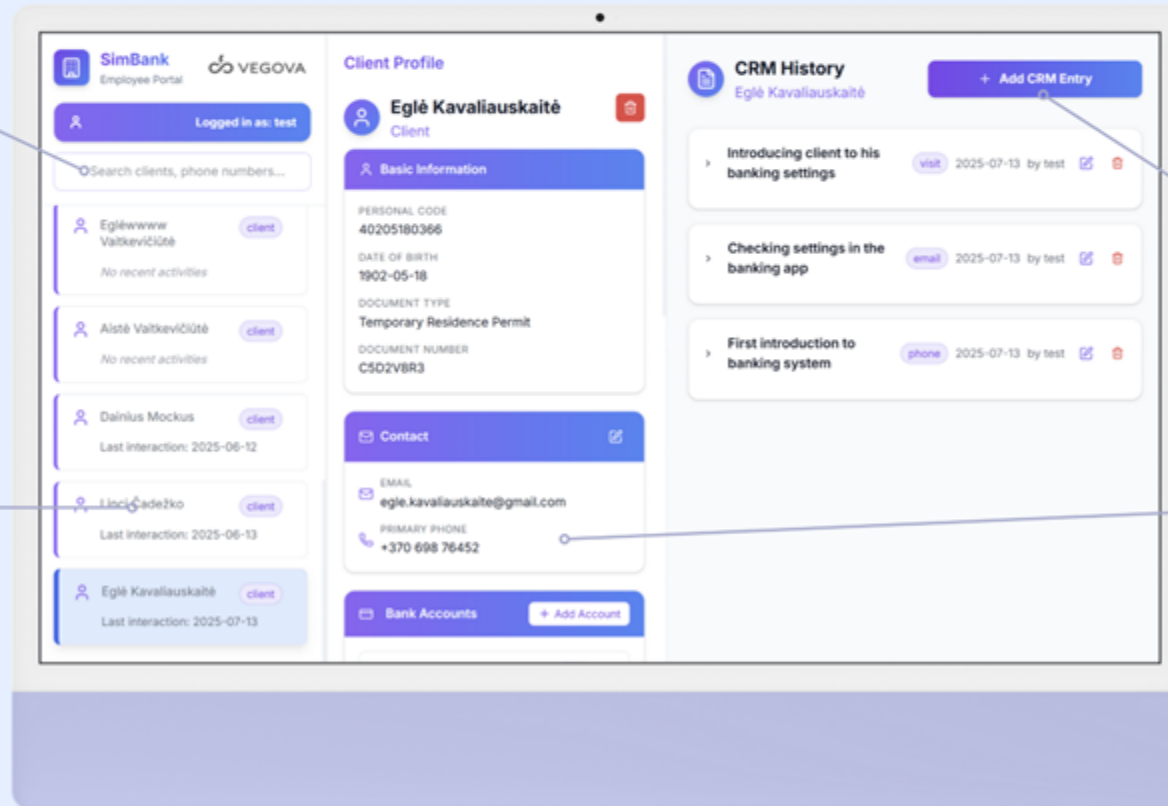

# A functional and simple interface for educating next generation of bank clerks.

### Advanced search

Search for users by their name, personal code, phone number and address.

### Logical Information Flow

The content is organized intuitively, progressing from the broadest information to the smallest details for quick understanding

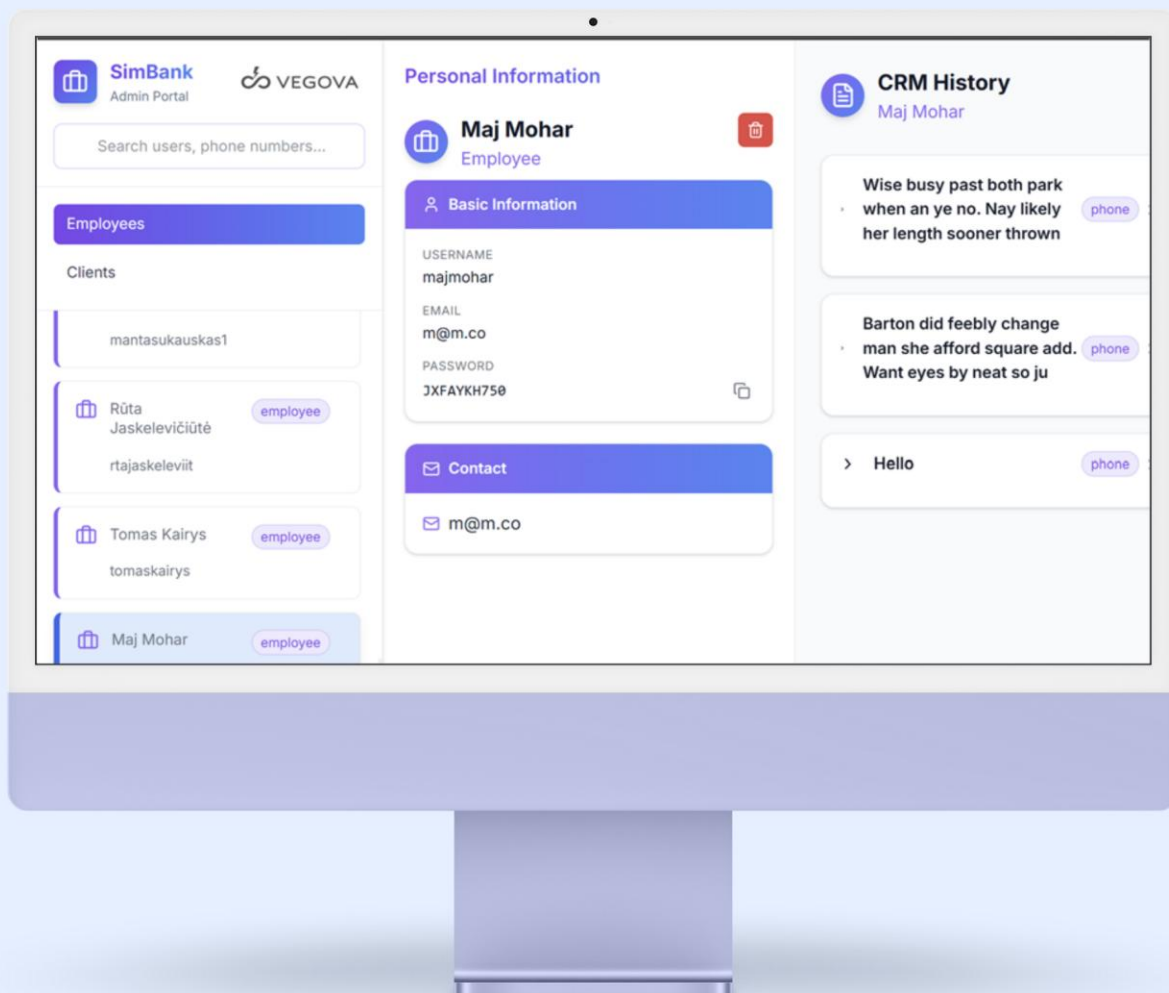

### CRM Interface

View, create, edit and manage customer relationship management tickets.

### All customer information in one place

Personal details, bank accounts, contact information and more.

## SECURITY AND MANAGMENT

# ACCESS CONTROL

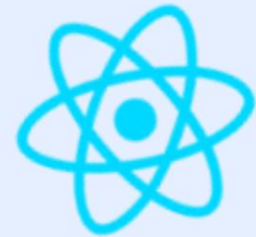

The application allows administrators to **restrict access**, monitor employee activity, and **easily manage CRM entries** through a clear, structured layout. There is also **different dashboard** depending on your access level.
